

## CHEMICAL AND MATERIAL HANDLING PUMPS

### Medium - Heavy Duty

Alemite Class 2, 3 and 4 Pumps are designed for medium to heavy fluids and medium semi-fluids, including adhesives, sealants and pastes. Power piston downtube combines the priming advantages of a ball check with the performance of an upper chop check to handle heavier loads. Recommended for dispensing, extruding and spraying applications.

#### FEATURES:

- Stainless steel construction and PTFE seals (model 7886-S5) will tolerate pumping corrosive fluids
- $\frac{3}{4}$ " NPTF(f) air inlet

**7886-S5**

Product #	Wetted Materials	Drum Size	Material Outlet	Seal Material	Pump Ratio	Free Flow (per minute)	Cycles	Weight
7886-A5	Carbon Steel	400 lb (180 kg)	1" NPTF(f)	Buna	11:1	13 gallon (49 liter)	30 per gallon (6.7 per liter)	78 lb (35.3 kg)
7886-S5	Stainless Steel	400 lb (180 kg)	1" NPTF(f)	PTFE	11:1	13 gallon (49 liter)	30 per gallon (6.7 per liter)	82 lb (37.2 kg)
