

# Adjustable Platforms

Over the years we have found an increased demand for Adjustable Platforms for maintenance work predominantly throughout the transport and logistics industry. Our first development of this particular design was for an Australian wide transporting company who specifically needed one platform with multiple heights in order to conduct maintenance throughout their fleet of heavy vehicles. Our Adjustable Maintenance Platforms have been carefully constructed and designed in house, with safety yellow painted handrailing for added visibility. Using aluminium with an alloy temper of 6061 T6 and load rated with a S.W.L of 200kg and a S.W.L of 150kg for the cantilever area, these units are one of the heavy equipment maintenance platforms on the market today.

## Standard specifications for STAR ADJ Platforms:

- 3mm Checker plate
- Step section 67° angle
- Powder coated safety yellow hand railing
- Retractable wheel system
- Safety arms at front & rear
- Standard 800mm adjustments in height

## Optional upgrades for STAR ADJ Platforms:

- Set of Wings
- Access cage or Access hoop for cantilever
- Forklift pockets
- 1000mm adjustments in height
- Wheel upgrades
- Tool trays
- Self closing gate

Specifications Adjustable Work Platforms						
Product Name	Platform Height	Height Adjustments	Platform Area	Cantilever Platform	Handrail height	Total Base Length
STAR ADJ P1400	1400mm	1400 – 2200mm	750 x 900mm	750 x 700mm	900mm	2100mm
STAR ADJ P5'	1500mm	1500 – 2300mm	750 x 900mm	750 x 700mm	900mm	2150mm
STAR ADJ P6'	1800mm	1800 – 2600mm	900 x 900mm	900 x 800mm	900mm	2350mm
STAR ADJ P7'	2100mm	2100 – 2900mm	900 x 900mm	900 x 800mm	900mm	2500mm
STAR ADJ P8'	2400mm	2400 – 3200mm	900 x 900mm	900 x 800mm	900mm	2650mm
STAR ADJ P9'	2700mm	2700 – 3500mm	1000 x 1000mm	1000 x 800mm	900mm	2800mm
STAR ADJ P10'	3000mm	3000 – 3800mm	1000 x 1000mm	1000 x 800mm	900mm	2950mm
