

SafePour

SP15-25

This design has been developed to hold most 15 to 25 litre drums which can be rectangle or round and of either plastic or metal. The SP15-25 requires minimal assembly and has a flat-folding option for easy storage.

SP200

The SP200 is designed to hold 200 litre or 44 gallon metal drums which, when decanting, appear virtually weightless. A unique system allows the metal drum to be automatically returned to the safe upright position when released. The SP200 is extremely durable; manufactured with robust welded material and a powder coated finish.

SP Multilifter

The SP Multilifter can be used to load up to 500kg metal drums for a variety of lifting applications. It is designed to eliminate the need for two separate lifting devices and can be used to lift drums with and without lids. It also features a positive lock action which grips the rim of the drum for hands-free safety.

Stock Code	SAF225	SAF230	SAF250
Rated Capacity	15 – 25 litre	205 litre	500 kg
Net Weight (kg)	8	16	4

Lemcol Drum Truck

This product has been manufactured for ease of handling full 200 litre drums and hogsheads.

Due to the unique design, size and relative weight makes almost no difference to the balance and efficiency of the Drum Truck.

The L60 is of steel construction with strain points specially reinforced to withstand the toughest treatment.

The models are offered with two types of wheels Cushion tyred wheels provide a greater capacity while having the added advantage of being puncture-proof. Pneumatic wheels are offered where greater shock absorbency is required or where operating conditions are a consideration.

When stored in an upright position, the compact L60 requires only 0.3m² of floor space.
