

DRUM HANDLING

Lemcol Drum Rack

This sturdy built rack has been designed to facilitate convenient, safe and efficient stowage of drums and barrels for decanting.

Taking the backbreaking work out of drum handling, they are indispensable in garages, warehouses and factories.

A standard Lemcol 75mm nylon wheel is used for ease of replacement.

DRUM RACK

SDBP - Bunded Drum Storage System Suitable for Pallet Trucks

All liquids stored on site need to be safely bunded, (as required by law) and in a unit which will contain at least the largest stored container should it spill. This is now a simple matter with SPILLDOKTOR poly drum bunds. Available in both 2 drum and 4 drum sizes, featuring removable grating and

provision for fork tynes, and made from heavy duty polyethylene for durability.

Model	Description	Capacity
SDBP2	Polyethylene 2 Drum Bund	240L
SDBP4L	Polyethylene 4 Drum Bund	230L
