SDBT230 Spill Containment Caddy

This unit features a unique design which makes use of the lever principle to rotate a standing drum to the horizontal position, where a swivel wheel allows the whole unit to travel along the floor. The caddy doubles as a bund, with a 230 litre capacity to contain at least one whole container, should it spill or leak.

Model	Description	Capacity
SDBT230	Drum Rack & Stack Poly Base Unit	400L
