

## EMERGENCY SHOWERS, EYE AND EYE/FACE WASHES

### 1. EMERGENCY EYE WASH NO-BOWL PEDESTAL MOUNTED HAND/FOOT OPERATED

#### PRODUCT INFORMATION

Enware's eyewashes flush hazardous contaminants and irritants from the eyes. Independently tested to comply with Standards ANSI Z 358.1 and AS 4775.

Stainless steel construction for superior durability and reliability, choose powder coated for extra chemical resistance.

- Hand or foot-activated eyewash with the soft aerated flow and integral auto-open dust covers
- Zero velocity apex point provides more comfort and control for effective cleansing of eyes
- Stainless steel bowl, hand and foot actuator and stay-open ball valve
- Self-draining design reduces bacteria risk, particularly in tepid water applications
- High visibility yellow powder coated push handle and foot pedal
- Designed and made in Australia

## 2. EMERGENCY EYE WASH PEDESTAL MOUNTED – HAND OPERATED

### PRODUCT INFORMATION

Enware's eyewashes flush hazardous contaminants and irritants from eyes. Independently tested to comply with Standards ANSI Z 358.1 and AS 4775.

Stainless steel construction for superior durability and reliability, choose powder coated for extra chemical resistance.

- Push activated eyewash with the soft aerated flow and integral auto-open dust covers
- Zero velocity apex point provides more comfort and control for effective cleansing of eyes
- Stainless steel bowl, hand actuator and stay-open ball valve
- Self-draining design reduces bacteria risk, particularly in tepid water applications
- High visibility yellow powder coated push handle
- Designed and made in Australia

### 3. EMERGENCY EYE WASH PEDESTAL MOUNTED HAND/FOOT OPERATED

#### PRODUCT INFORMATION

Enware's eyewashes flush hazardous contaminants and irritants from the eyes. Independently tested to comply with Standards ANSI Z 358.1 and AS 4775.

Stainless steel construction for superior durability and reliability, choose powder coated for extra chemical resistance.

- Hand or foot-activated eyewash with the soft aerated flow and integral auto-open dust covers
- Zero velocity apex point provides more comfort and control for effective cleansing of eyes
- Stainless steel bowl, hand and foot actuator and stay-open ball valve
- Self-draining design reduces bacteria risk, particularly in tepid water applications
- High visibility yellow powder coated push handle and foot pedal
- Designed and made in Australia

#### 4. EMERGENCY EYE/FACE WASH NO-BOWL PEDESTAL MOUNTED HAND OPERATED

#### PRODUCT INFORMATION

Enware's eye/face washes flush hazardous contaminants and irritants from eyes and facial area. Independently tested to comply with Standards ANSI Z 358.1 and AS 4775.

Stainless steel construction for superior durability and reliability, choose powder coated for extra chemical resistance.

- Push activated with dedicated eyewash and independently angled face wash streams for optimum coverage
- Zero velocity apex point provides more comfort and control for effective cleansing of eyes and face
- Stainless steel bowl, hand actuator and stay-open ball valve
- Self-draining design reduces bacteria risk, particularly in tepid water applications
- High visibility yellow powder coated push handle
- Designed and made in Australia

## 5. EMERGENCY EYE/FACE WASH NO-BOWL PEDESTAL MOUNTED HAND/FOOT OPERATED

### PRODUCT INFORMATION

Enware's eye/face washes flush hazardous contaminants and irritants from eyes and facial area. Independently tested to comply with Standards ANSI Z 358.1 and AS 4775.

Stainless steel construction for superior durability and reliability, choose powder coated for extra chemical resistance.

- Hand or foot-activated with dedicated eyewash and independently angled face wash streams for optimum coverage
- Zero velocity apex point provides more comfort and control for effective cleansing of eyes and face
- Stainless steel bowl, hand and foot actuator and stay-open ball valve
- Self-draining design reduces bacteria risk, particularly in tepid water applications
- High visibility yellow powder coated push handle and foot pedal
- Designed and made in Australia

## 6. EMERGENCY EYE/FACE WASH PEDESTAL MOUNTED HAND/FOOT OPERATED

### PRODUCT INFORMATION

Enware's eye/face washes flush hazardous contaminants and irritants from eyes and facial area. Independently tested to comply with Standards ANSI Z 358.1 and AS 4775.

Stainless steel construction for superior durability and reliability, choose powder coated for extra chemical resistance.

- Hand or foot-activated with dedicated eyewash and independently angled face wash streams for optimum coverage
- Zero velocity apex point provides more comfort and control for effective cleansing of eyes and face
- Stainless steel bowl, hand and foot actuator and stay-open ball valve
- Self-draining design reduces bacteria risk, particularly in tepid water applications
- High visibility yellow powder coated push handle and foot pedal
- Designed and made in Australia

## 7. EMERGENCY STAINLESS STEEL COMBINATION SHOWER HAND/FOOT OPERATED EYE WASH

### PRODUCT INFORMATION

Enware's emergency safety shower assists in the rapid flushing of contaminants from the body with a deluge of flushing fluid and eye wash units help to flush contaminants and irritants from the eyes and facial area.

Designed and manufactured in Australia. Independently tested for compliance to ANSI Z358.1 and AS4775.

- Freestanding for stand-alone operation
  - Stainless steel pipework & stay-open ball valve
  - Stainless steel 200mm (8") showerhead assembly
  - Stainless steel handle with high visibility yellow powder coating
  - Hand push and foot-activated eyewash with integral auto-open dust covers
  - Self-draining design reduces Legionella risk, particularly in tepid water applications
  - Eyewash features "Vertech™ Technology" where dedicated eyewash streams deliver optimum coverage
  - Zero velocity apex point provides comfort and control for effective cleansing of eyes
-
