POD FIRE FIGHTING SYSTEM

IBC Tank Included

INCLUDES:

Aussie Pump - QP2055E/GX160 - Max flow 450LPM - Max Head 75M - Honda Engine recoil start

OR Davey 5155H - Max flow 431LPM - Max head 60M - Honda Engine GX160 recoil start

Hose Reel: BFI Red Fire Fighting Hose Reel - 36m x 25m Black Fire Hose - PVC adjustable nozzle OR Performa Black Fire Fighting Hose Reel - 36m x 25m Black Fire Hose - PVC adjustable nozzle

Designed for light Commercial and Farmers in mind the Aussie Pod would be a very suitable addition to any Commercial, Farm, Trade or household that can be faced with bush fire dangers; also suitable for washdown and water transfer application.

Special design of brackets allows Pump Frame and Hose Reel to be quickly attached to any IBC or Pod Tank. Adaptability of brackets allows the choice of 2 types of Hose Reels or different Pumps to be quickly fitted or changed and can be removed and stored for travel.

Quick connect hoses with Camlock Fittings allows for pumping to or from tank, giving the option of remote refilling from dams or water tanks by adding an extra hose.

This means if you run out of water you can quickly refill IBC by changing hose or switch pump and hose reel to another IBC and continue protecting your property.

Tank Pod assembly will easily fit all Flat Tray and Utes.
