

# Large Powerjet Nozzle

Large Powerjet Nozzle

## Large Powerjet Nozzle

Manufactured in New Zealand from high impact strength polymer these nozzles can be adjusted easily and smoothly with a twist of the wrist for a strong jet throw, cone spray, or fog pattern. They feature an overmoulded black polyurethane protective bumper to extend the life and prevent damage to expensive marine decking and hardware. They are the ideal high pressure nozzles for wash down and marine fire protection on boats and dockside. Available with either a Composite or Brass Valve inner.

## Features

- Typical flowrate of up to 300 Litres/min
- Approved for use with fire hoses on surveyed vessels in New Zealand

- Overmoulded black polyurethane protective bumper
- Thread size 1½" BSP
- 4 sizes of tail options available (19mm, 25mm, 32mm, and 38mm)
